

# Wood Planks

CR-Wood Planks is a polymer-modified overlay system which provides a slip-resistant surface while providing unique color patterns. CR-Wood Planks can be applied to meet your specific request; width, length, color or texture. The end result is a durable and minimal maintenance custom surface.

What separates CR-Wood Planks from other similar products? It's simple - our experience. Keefe is a pioneer in decorative concrete. Being one of the very first artists to develop concrete wood planks, Keefe has perfected the look, feel and unique color options to meet your needs.

CR-Wood Planks provides the confidence and proven results that consistently meet the quality expectations of our team and trusted clients.
